PROFILE

Computer Science graduate with hands-on experience building data pipelines, analytics platforms, and AI-powered applications through multiple end-to-end projects. Skilled in Python, SQL, and modern data engineering tools including Kafka, Spark, Airflow, and PostgreSQL. Developed systems involving real-time data ingestion, ETL pipelines, REST APIs, and interactive analytics dashboards. Passionate about designing scalable data systems that transform raw data into actionable insights.

EDUCATION

Masters in Computer Science 08/2021 – 12/2022
Kennesaw State University Marietta, Georgia

Bachelor of Technology in Computer Science 2016 – 2020
Anil Neerukonda Institute of Technology and Sciences Visakhapatnam, AP

Projects

Agentic Travel Intelligence Platform
Next.js • FastAPI • PostgreSQL • Groq Llama-3 • Docker
- Built a full-stack analytics platform to analyze global travel destination affordability.
- Developed backend APIs to compute travel budget comparisons across destinations.
- Integrated an AI travel assistant powered by Groq Llama-3 to answer natural language travel questions.
- Designed interactive dashboards to visualize travel analytics.
- Deployed the platform using Vercel, Render, and Neon PostgreSQL.

YouTube Trending Analytics Pipeline
Python • PostgreSQL • Streamlit • Plotly • GitHub Actions
- Built a data pipeline that collects trending YouTube videos across multiple countries using the YouTube API.
- Stored daily snapshots of trending data in PostgreSQL.
- Developed a Streamlit dashboard to visualize video popularity trends and cross-country comparisons.
- Automated daily data ingestion using GitHub Actions.

Real-Time Crypto Analytics Platform
Kafka • Spark • Airflow • PostgreSQL • Power BI
- Designed a real-time data pipeline to ingest cryptocurrency market data from external APIs using Kafka.
- Implemented Spark Structured Streaming to process streaming price events and compute real-time analytics.
- Built Airflow DAGs to orchestrate ETL workflows and generate aggregated reporting datasets.
- Stored processed data in PostgreSQL and created Power BI dashboards for historical and volatility analysis.
- Containerized pipeline components using Docker for reproducible development environments.

SKILLS

Programming
Python, SQL, C, C++

Databases
MySQL, PostgreSQL

Cloud Platforms
AWS, Azure

Data Platforms
Apache Spark, Apache Airflow

Visualization
Power BI, Tableau

Data Engineering
ETL Pipelines, Data Modeling, Data Processing, Query Optimization

Frameworks & Tools
FastAPI, Pandas, Streamlit, Plotly, Git, Rest APIs, Docker

Strengths

- Strong analytical and problem-solving skills with a logical mindset
- Effective communication and collaboration in team environments
- Quick learner with a passion for staying updated with emerging technologies

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate

Microsoft Certified: Azure Data Fundamentals
